David Marsal Ivars

Full Stack Developer specializing in Backend Engineering | PHP · Symfony · Laravel

davidmarsalivars@gmail.com • linkedin.com/in/davidmarsalivars • github.com/dmarsal90

PROFESSIONAL SUMMARY

Web developer with over 7 years of experience, specialized in PHP with a full stack profile. I focus on improving the performance of existing products, modernizing legacy systems and building new projects from scratch. I build scalable web applications, APIs and integrations with PHP, Symfony and Laravel. I modernize legacy systems and publish open-source libraries.

PROFESSIONAL EXPERIENCE

Web Developer **Sep 2026 – Present**
MegaNet
New features and maintenance of web applications with Laravel on the backend and Vue.js on the frontend.

Backend Developer **Jan 2025 – Aug 2026**
Motorflash
Built REST APIs for integrations with external systems and moved legacy projects to modern platforms, improving performance and security.

Web Developer **Jun 2023 – Jan 2024**
Cyberline Technologies SL
REST and SOAP APIs to connect external systems to the platform, legacy migrations and single sign-on (SSO).

Full Stack Developer **Mar 2023 – Present**
Flexvision.be
SQL performance work, external API integrations, fixing critical bugs and security flaws, and modernizing legacy systems with SOLID principles and object-oriented design.

Full Stack Developer **Sep 2022 – Jan 2023**
Lápida Solutions
Database upkeep and query tuning, critical bug fixes, asynchronous components and modular CSS with Sass and Less.

Project Manager **Aug 2021 – Dec 2023**
CDAI
Estimated resources and schedules, ran project and process plans, managed risks and changes, and led the team.

Freelance Full Stack Developer **Sep 2019 – Jul 2021**
Clients in Chile, Denmark, the United States and Spain
Fixed bugs, finished unfinished products and migrated legacy systems, working remotely.

SELECTED PROJECTS

Matchly (Laravel 13, Vue 3, PostgreSQL, Docker) – Open-source remote job search tool: gathers listings from 13 public sources, scores how well each fits your profile, tracks applications and prepares interviews. github.com/dmarsal90/Matchly

E-commerce (Laravel, Sanctum, Next.js, TypeScript, Zod) – Online store split into a REST API and an independent multilingual storefront. github.com/dmarsal90/ecommerce-api · ecommerce-front

ZipWarden (PHP, JavaScript) – Safe ZIP reading and extraction that protects against zip slip and zip bombs, with equivalent PHP and JavaScript implementations. github.com/dmarsal90/zipwarden-php · zipwarden-js

Whistleblower (PHP, Laravel, Symfony) – Internal whistleblowing channel for Laravel and Symfony based on Spain's Ley 2/2023. github.com/dmarsal90/whistleblower

TECHNICAL SKILLS

Backend engineering: PHP, Laravel, Symfony, CakePHP, Yii, REST APIs, SOAP, SSO, WordPress
Frontend development: JavaScript, TypeScript, Vue.js, React, Next.js, Tailwind CSS, Bootstrap, Sass, Less, jQuery, Material UI
Databases: MySQL, PostgreSQL, SQL, Redis
Software architecture: Domain-driven design (DDD), Hexagonal architecture, CQRS, SOLID, REST API design
DevOps and tooling: Docker, Git, GitHub Actions, Scrum
Testing and quality: Pest, PHPUnit, Vitest, PHPStan, ESLint

EDUCATION

Postgraduate in Cryptography – UCI **2020 – 2021**
Computer Engineering – Universidad Ignacio Agramonte **2014 – 2019**
